

Beyond Borders: Global AI and Data Compliance in Workforce Management

AI is reshaping hiring, performance management, and workforce monitoring, and the rules governing it do not stop at the U.S. border. Join members from our Artificial Intelligence and Innovation Practice Group, as well as our Cybersecurity and Privacy Practice Group, for a straightforward discussion on how AI laws in the United States align with the requirements in the EU, UK, and Canada. The speakers will also explore what this means for organizations whose workforce or AI tools operate internationally.
