DESCRIPTION

The supply-chain crunch isn't simply delaying the shipment and delivery of holiday purchases. California employers are encountering recruiting, hiring, and safety challenges, and other issues associated with a tight labor market, as the need for logistics employees, drivers, skilled tradespeople, and other workers increases across a myriad of industries. In this informative webinar, the speakers will take a deep dive into problem-solving and offer practical tips for managing a California workforce in the midst of supply-chain troubles. The speakers will also discuss benchmarking, hiring mistakes, onboarding, and discipline, as well as best practices across various industries including transportation, retail, and manufacturing.
